MESOS BUSINESS SCHOOL

MESOS BUSINESS SCHOOL is recognized for its unique ability to train and support institutional leaders. We build bridges connecting academia, the business world and international societies to contribute to a more sustainable global community.

The school, its programs, and activities are led by industry champions and esteemed academics-crisscrossing scholarly excellence with empirical practice. Spread out across the continents in the Business hubs of today's metropoles - staying true to our motto "Born Global, Local Roots".

OUTLINE

In the Higher Diploma - Cybersecurity, students will learn to identify cybersecurity foundations and standard models for effective protection strategies. They will acquire skills to construct the best practices for mitigating common cyber-attacks upon course completion. Students will be equipped with the necessary data to explain cyber-attackers' techniques as well as gaining insights into data protection and online privacy methods while connected to public networks.

Module 01 - Overview of Cybersecurity

Number	Lecture	Course Hours
01	Foundations	28
02	What is Security?	14
03	The Threat Landscape	28
